WORK WITH US

As we grow, we are open to hosting gatherings and sharing our knowledge in different ways. You can reach out to us about:

- Critical Technology Workshops
- Programming events
- Speaking engagements
- Commissions (Research, Design, and Writing)

If you are interested, please email us at futureinventions.lab@gmail.com with the following information:

- Name
- Tell us a bit about yourself/ your organisation
- What type of project are you interested in:

- Critical Technology Workshops
- Programming events
- Speaking engagements
- Commissions (Research, Design, and Writing)

- Do you have a timeline for this project?
- Do you have a budget for this project?
- Please tell us briefly about the project and if you'd like to meet.

COMMUNITY TECHNOLOGY SCHOOL

Write an improved description of the school format/process + links to previous syllabi (included below)

Description: The Community Tech School of Future Inventions is a reading group focused on critical discourse around technology practice from an Afrocentric point of view.
We operate in months-long cycles. Cycle 1 ran from November 2024 to April 2025 and explored topics such as digital colonialism and ancestral technologies. Cycle 2 was themed The Machine and Me, a series of educational events dedicated to demystifying AI through an artistic lens and offering critical perspectives on this rapidly growing yet largely unchecked technology. It ran from Autumn 2025 to Spring 2026.
The CTS hosts sessions between Abuja and London, and online.
The format is an open reading group facilitated by the Future Inventions team in collaboration with guest speakers/facilitators on occasion.

Resource lists(messy dump):

Ancestral Technologies Resource List:

These are a few selections from our longer list which is still growing, here

EXPLORE:

- An African Design Canon
- Zambezi Radical Archives
- Achebe's Internet: Proverbial Protocol

READ:

- Towards New Metaphors of Consciousness by Enos Nyamor
- What else can technology be? : Uzoma Orji in conversation with Kombo Chapfika
- From the Sasha into the Zamani: Death as a Moment of Radical Continuity by Zainab Aliyu
- On Remembering: Conceptualizing “Ancestral Malaise” and Its Relationship to Quantum Technology by ink mcneill

WATCH:

- In Conversation: Legacy Russell & Salome Asega
- The Fractals at the Heart of African Design - Ron Eglash

LISTEN:

- Podcast Episode: Indigenous Tech, Indigenous Knowledge: Wampum.codes as a model for decolonization - Spotify (and on several other platforms)

The Experimental Web: Resource List

These are a few selections from our longer list which is still growing, here

EXPLORE:

Garden Garden Garden

THE LAB

Description of upcoming fellowship

The Community Technology Lab supports people of colour to explore, question, and reshape the technologies that impact our lives. Through a 10-week school, six fellows will take part in workshops on digital colonialism, community-centred design, and speculative prototyping, culminating in the creation of either a tool or artwork that responds to needs within our communities. The programme includes dedicated learning time, co-design sessions, guest-led workshops, and a showcase. The Lab aims to expand public participation in technological discourse through hands-on experimentation in order to develop new models for community-led innovation that are inclusive, culturally grounded, and designed with care.

OUR BOOK

Imagination As Protocol: A Community Technology Guide (2026)

What if invention began with care and we treated relationships as infrastructure? Future Inventions gathers research, reflections, and creative prompts exploring alternative histories and futures of technology, inviting readers to expand their technological imagination and reconsider what technology is, where it comes from, and who gets to make it.

54 pages, designed by Ana Marques and printed by Calvert's Press.

Commissioned by:
Designed by:

OUR ARTWORKS

Network as Infrastructure: An Alternative History of Community Technology (2026)

A genealogy of community-owned communication infrastructures, tracing how Black, anti-colonial and grassroots traditions have imagined connection as a shared cultural practice.

Shape Shifter (2026)

An interactive work that moves with you, mimicking how dance is both innate knowledge and transmitted through gathering/learning from one another
